

Morris County Conservation District

Council Grove, KS

Contractors List

What is Dig Safe @?

State laws require anyone who digs to notify utility companies before starting, and for good reason. Digging can be dangerous and costly without knowing where underground facilities are located.

Dig Safe System, Inc. is a communication network, assisting excavators, contractors and property owners in complying with state law by notifying the appropriate utilities before digging. Dig Safe®, a free service, notifies member companies of proposed excavation projects.

In turn, these member utilities respond to the work area and identify the location of underground facilities. Callers are given a permit number as confirmation.

Member utilities, or contracted private locators, use paint, stakes or flags to identify the location of buried facilities. Color coding is used to identify the type of underground facilities:

Dig Safe is a not-for profit corporation, funded entirely by member utility companies, to promote public safety, protect vital utility services and safeguard against property and environmental damage.

RED	ELECTRIC
YELLOW	GAS, OIL, STEAM
ORANGE	COMMUNICATIONS
BLUE	POTABLE WATER
PURPLE	RECLAIMED WATER
GREEN	SEWER / DRAINAGE
PINK	SURVEY MARKS
WHITE	PROPOSED EXCAVATION

*Dig Safe processes all locate requests
Monday through Friday from 6 a.m. to 6 p.m., not including holidays
Off hour coverage is provided for emergency work only.*
